Original Text

1 - The Medical University of Hanoi (UMH) is considering the use of the expertise of a consultant from funding made available to the Government of the Socialist Republic of Vietnam by AFD and delegated by it the UMH. 2 - The modernization of the UMH, the construction of a university hospital and the establishment of the University Hospital of Hanoi are priorities of the Vietnamese Government. In the hospital sector in Hanoi, the authorities' objective is to improve the quality of care, increase the capacity of care and to promote the establishment of new settlements on the outskirts of the city where the population is rapidly growth. With the exception of the construction of the hospital of the UMH, existing hospitals of the city center will not increase their capacity to care. UMH has already opened in 2008 a 150-bed hospital on its campus, including the ability has since been increased to 280 beds. It is expected that this hospital is not only a place of high-level care, but also a place of education (mainly postgraduate), transfer of advanced technology and research. Finally, the Department of Health created the University Hospital of Hanoi by a decision of January 16, 2007. 3 - Taking into account the constraints of the current site of the campus of the UMH and opportunities for expansion of the hospital, he been decided to split this extension in two phases - first phase of the current site with an extension corresponding to approximately 100 beds and all with 350 beds - a second phase, corresponding to 250 to 300 beds, on land Linh Dam has distinct already identified and is likely to be made available to the UMH by the People's Committee
of Hanoi. 4 - France has been asked by the Vietnamese authorities to support the project and confirmed its willingness to collaborate in this project CHU French model, including a technical assistance component carried by the AFD. AFD has provided a draft of 1 million grant in 2010, including providing technical assistance (short and long term), education and training, and a partnership with a French university hospitals. 5 - To support the effective implementation of Chuh and specify the planned extension of the hospital in the UMH, it is expected to appoint a consultant conducting a feasibility study to (i) finalize the draft Medical of Chuh (including both sites), (ii) determine the technical and financial data of the first phase of the project and (iii) specify, in relation to the technical assistant provided the UMH of AFD funding from that will be mobilized, the project activities financed by AFD. 6 - The duties of the consultant will: - support UMH in finalizing its medical project, allowing at least identify the disciplines and the necessary equipment and distribution between the two sites, the program capability, the main principles of medical and administrative organization, etc.. - study the conditions of technical feasibility and budget of the first phase of expansion of the hospital in Hanoi on its UMH current site; - specify the activities of the project financed by AFD (technical assistance, training, partnership with a French university hospitals, etc.). Chuh support and develop recommendations for improving the management capacity of the UMH and relationships between UMH and hospitals of application; - define a detailed technical program (works and equipment) of the first phase of the extension on the current site; - prepare the appeal for tenders selecting a prime contractor in charge of technical studies (first phase) and make recommendations for the conduct of the second phase of the extension. The Medical University of Hanoi invites Consultants interested in providing the services described above are invited to express their interest by providing: - application letter from an authorized representative of the Consultant; - presentation of the Consultant (area of responsibility and its legal status) - description of the means (i) qualified staff and availability of appropriate skills to carry out the study among staff, (ii) material resources; - information on the financial strength (balance sheets of the consultant for the past three years, bank details) - References for the execution of similar benefits in the past ten years under similar conditions. Applicants may associate to enhance their qualifications. In this case, the information included in the application form will cover the various members of the group by showing the means and skills of each. Membership is open to consultants from all countries. Expressions of interest must be filed three (3) copies (one original and one copy and one electronic copy on CD-ROM) no later than 12 / 12 / 2011-16 pm (local time) at the following address: Medical University of Hanoi , 1 Ton That Tung Street, Dongda, Hanoi, Vietnam, to the attention of Ms. Do Thi Thu Linh with “application and feasibility study Chuh hospital UMH.” The establishment of the shortlist will be established primarily on the basis of general experience of the Consultant; its workforce, skills and experience of personnel proposed for the mission; similar missions already performed by the Consultant. The consultants will be selected later a letter of invitation to tender, with a record of limited tendering. Selection will be in accordance with the procurement procedures of the Socialist Republic of Vietnam and in accordance with international best practice in this area required by the AFD.
